- ✧ [LinkedIn](#)
- ✧ [Medium blog](#)
- ✧ [Github](#)
- ✧ [Website](#)

### LOCATION

Tel-Aviv, Israel  
Open to relocation

### LANGUAGES

**English** Fluent  
**Russian** Native  
**Hebrew** Working proficiency

### EDUCATION

#### Bachelor of engineering and technology

Technical Cybernetics faculty,  
Distributed Computing and  
Networking department

Peter the Great St.Petersburg  
Polytechnic University , 2008  
– 2012

### Summary

Hi! I'm a programmer with over 10 years of commercial experience and a passion for public speaking and networking.

I'm good at:

- Development of complex and scalable frontend applications with React/Angular using modern state managers(ngrx, redux, akita)
- All types of testing (jest, protractor, cypress)
- Tuning project build and CI/CD systems (teamcity, jenkins, github actions, gitlab, circleci)
- Being curious about new things
- Finding solution for any problem (or explaining how to do a workaround if it can not be solved right now)

My biggest flex is that I have bought my car (10 y.o. Skoda Fabia, but still) on money my team won in [hackathon](#) :)

### Commercial programming experience

#### Senior Frontend Infra Engineer

**Yotpo | December 2021 – March 2024 | Tel Aviv**

Joined as one of the first members of freshly created FE Infra team in the company

**Stack: React, Angular, Lit, Nodejs, Github Actions, Backstage, AWS**

- ✧ ui components library (framework-agnostic web components on lit)
- ✧ reusable CI pipelines
- ✧ managed massive migration of 30+ projects upgrading Angular version
- ✧ integrating quality metrics + observability tools into projects
- ✧ Consulting peers on day2day FE tasks
- ✧ Internal workshops on CI, Angular, e2e testing
- ✧ Knowledge sharing sessions on demand
- ✧ Filling Backstage with up2date documentation, core concepts explanation and architecture diagrams

#### Frontend consultant

**Push-based | March 2021 – September 2021 | Remote**

Worked as a part of distributed team offering frontend consulting/development services

**Stack: React, Angular, Circle CI**

- ✧ Improving performance of product UI in the browser
- ✧ Optimising CI processes and pipelines
- ✧ Conducting workshops and creating educational materials for developers

## SKILLS

### Programming

angular, react, lit, typescript,  
nodejs, docker, AWS,  
webpack, all types of CI  
(teamcity, jenkins, github  
actions, gitlab), all types of  
tests (unit, integration, e2e,  
cypress, jest, protractor),  
backstage, definitely  
something else

### Senior Frontend Developer

**LawGeex | September 2019 – March 2021 | Tel Aviv Area, Israel**

Development of legal-tech solution focused on text documents processing

**Stack: React, Angular, Nodejs, Jenkins, Github actions, AWS**

- ✧ complex SPA for interactive .docx and .pdf editing in browser
- ✧ beautiful interactive analytics for customers
- ✧ internal tools for CS team
- ✧ internal knowledge sharing sessions

### Senior Frontend Developer

**Tinkoff Bank | 2017 – 2019 | Saint Petersburg, Russia**

Developed CRMs and web messengers(socket-based) with Angular5+

**Stack: Angular, AngularJS, Protractor, Teamcity, GitlabCI**

- ✧ Migrated entire project from angularjs to angular
- ✧ Introduced e2e-testing(protractor) into the project + improved unit-test coverage and related practices in the project
- ✧ Internal educational sessions on Angular and testing

### Frontend developer

**New Cloud Technologies | 2016 – 2017 | Saint Petersburg, Russia**

Developed file manager web-view for Russian GoogleDoc's competitor

**Stack: AngularJS, Webpack, Jenkins**

### Frontend developer

**Devexperts | 2014 – 2016 | Saint Petersburg, Russia**

Developed web-UI and js-plugins for online-trading platform

**Stack: React, AngularJS, VanillaJS, Handlebars**

---
